BACKEND DEVELOPER

Driven by **innovation** and addicted to **best coding** and **scalable architectural practices**, I have experience in building REST-Based microservices & integrations using popular stacks such as **SpringBoot, Hibernate, MySQL, Mulesoft(2XCertified) and Firebase tools** and have knowledge of **Node.js and Flutter** too.

TECHNICAL SKILLS

- Frameworks** : Spring Boot, Hibernate ORM, Mulesoft, Socket.io, Anypoint Monitoring, RAML, Anypoint Platform
- Cloud** : AWS EC2, FCM, Nginx, CloudHub, AnypointMQ, Salesforce
- DB's & Storages** : MySQL, H2, Google Cloud Firestore, Amazon S3
- Dev Tools** : IntelliJ Idea, VS Code, Anypoint Studio, Linux, Docker, Git, Azure Devops

EXPERIENCE

Application Developer (Now Sr. Application Developer) June 2023 – Present
Caelius Consulting Internship

- Built employee monitoring system for inhouse usage using Spring Boot 2.0, MySQL and Hibernate .
- Worked on building various orchestration(Mulesoft) & system(Java) layers for integrating Salesforce CRM, Salesforce Commerce Cloud, Acumatica, Avalara, LoanPro, Klaviyo, S3 Buckets(SFTP) etc.
- Worked with Senior Architects to design and develop complex integrations involving multiple caching layers, streaming, webhooks, batch processing & pub-sub based asynchronous data syncs.

EDUCATION

Chitkara University Chandigarh, India
Bachelor of Engineering in Computer Science(9.83/10) Aug 2020 – Aug 2024

PROJECTS

DigitBatua *Spring Boot, Hibernate ORM, Spring Security, JWT, Swagger-UI, Java Mail Sender, Git* [Source Code](#)

- Developed a fully functional Fintech BaaS (Backend as a Service) product, facilitating seamless integration of wallet functionality into business applications for user convenience.
- Implemented direct-transfer and request-transfer mechanisms, empowering users to make transactions effortlessly within the platform.

IEEE CIET *Cloud Firestore, FCM, Flutter, Git, Firebase Auth, Firebase Crash Analytics*

- Designed, developed, and deployed an event management application single-handedly, digitizing end-to-end operations for IEEE CIET, impacting over **300+** authenticated users.
- Implemented digital solutions for authentication, promotion, event registration, archiving, and feedback processes, eliminating manual intervention by over **98%** leading to its adoption by Chitkara University.

Light Connector *Node.js, Socket.io* [Source Code](#)

- A QR-based realtime file transfer mechanism built using socket.io rooms running inside docker container on EC2 for instant data transfer between Laptop and Mobile, reducing transfer time by 10-30% with enhanced accessibility and no storage policy.

ACHIEVEMENTS

- [Caelius Rookie Rockstar Award](#)
- [Caelius Tech Maveric Award](#)
- [Winner in Coffee & Code Hackathon \(100+ teams\)](#)
- [Crowd Hacks International Hackathon 5th Position \(250+ teams\)](#)
